PROFESSIONAL SUMMARY

Software Engineer with a backend focus and hands-on frontend experience using C#, ASP.NET Core/.NET, Angular, and TypeScript. At Atena, I modernize business workflows, improve data-access paths, and add regression coverage across .NET and Angular applications. I target software engineering and backend roles where maintainability, reliable delivery, and clear domain boundaries matter.

EXPERIENCE

Atena

Jr. Software Engineer

Remote, Peru

Jan 2026 – Present

- Replaced complex RxJS chains with Angular 19 Signals in legacy dashboards, centralizing reactive state and removing redundant subscriptions.
- Optimized C# (.NET 8) Web APIs and Entity Framework Core queries with projections and AsNoTracking to reduce unnecessary data loading in reporting workflows.
- Developed end-to-end features connecting SQL Server stored procedures with typed Angular components through TypeScript interfaces and DTOs.
- Added unit tests for business-logic services and integrated them into existing CI/CD workflows to strengthen repeatable regression checks.

Freelance Software Developer

Software Developer

Remote

Aug 2024 – Dec 2025

- Delivered custom web solutions for SMEs using the MERN Stack and .NET, managing the software lifecycle from requirements gathering to Docker deployment.
- Built and deployed SEO-focused landing pages for SMEs, applying structured metadata, asset optimization, and Core Web Vitals tuning.

Chirasoft

Junior Software Developer

Piura, Peru (Hybrid)

Mar 2025 – Jun 2025

- Migrated an institutional portal frontend from WordPress to Angular 19, rebuilding responsive pages and preserving SEO metadata in the new application.
- Developed and maintained the product module for an e-commerce platform using Java Spring Boot and Angular, delivering typed API integration across product workflows.
- Designed and prototyped high-fidelity UI/UX mockups in Figma for the institutional portal and e-commerce platform, establishing a reusable visual reference for both products.

Municipalidad Provincial de Piura

IT Support & Developer Intern

Piura, Peru

Jun 2024 – Dec 2024

- Provided technical support for hardware installation, printer configuration, and maintenance of user workstations across the institution.
- Managed VLAN configuration, subnetting, and internet protocol settings for the institution's network infrastructure.
- Performed data backups and user-information recovery, and reviewed legacy FoxPro systems for migration to React and MySQL.

TECHNICAL SKILLS

Core Backend: C# (.NET 8/9/10), ASP.NET Core, Entity Framework Core, LINQ, RESTful APIs
Core Frontend: Angular 19/22 (Signals), TypeScript 5.0+, Tailwind CSS, RxJS
Data & AI: SQL Server (T-SQL), Python (Pandas, TensorFlow/Keras), PostgreSQL
Infrastructure & Tools: Docker, Git/GitHub Actions, Postman, Model Context Protocol
Concepts: Clean Architecture, SOLID, Dependency Injection, Design Patterns (Repository, Singleton), Agile/Scrum
Languages: Spanish (Native), English (Intermediate; self-assessed B1-B2)

PROJECTS & RESEARCH

Kioku <i>C# (.NET), Model Context Protocol, Obsidian, Hybrid Search</i> <i>Source / Demo</i>	2026
- Designed and continue to maintain a local-first .NET MCP server that preserves and retrieves structured knowledge from Obsidian vaults across AI-agent sessions. - Implemented backend capabilities spanning hybrid retrieval, durable sessions, testing, CI, and technical documentation without claiming adoption, production scale, or SLA results.	
FluentReads <i>Astro, React, TypeScript, Static Site Generation (SSG)</i> <i>Source</i>	2026
- Built an e-commerce catalog with Astro and React using static site generation, semantic metadata, and optimized asset delivery. - Implemented dynamic product filtering, routing, and a client-side shopping cart using TypeScript and React components.	
MAD AI - Enterprise User Management <i>Angular 19, Clean Architecture, TypeScript</i> <i>Source</i>	2025
- Structured an Angular 19 SPA around Domain, Infrastructure, and Presentation boundaries to isolate responsibilities. - Implemented Repository Pattern, Facades, and Use Cases to separate business logic from state-management details. - Developed a granular RBAC system with custom Guards and Interceptors to protect routes and API requests.	

EDUCATION

Universidad Nacional de Piura	Piura, Peru
<i>Bachelor's degree (Bachiller) in Ingeniería Informática; professional-title thesis in progress</i>	
Alura Latam	Remote
<i>Data Science Specialization (Scholarship)</i>	<i>Aug 2025</i>
HarvardX	Remote
<i>CS50's Web Programming with Python and JavaScript</i>	<i>Feb 2025</i>
